How to Get "The Ellington Look" in Your Home

*Makeover Tips from The Ellington Interior Designer Audrey Long
 as seen on ABC's Channel 6 Action News*

If you are lucky enough to have high ceilings and open space like we do at The Ellington, use big furniture pieces to emphasize the grandness of your home. Stay away from small, fussy pieces and clutter! They actually make the space feel smaller.

Here at The Ellington, we use a neutral backdrop to create a soothing, luxurious feel. But neutral doesn't have to be boring! Make use of bright accent pieces, such as the green vases and glass votive candles in our living room, to add excitement. Then you can always change the feel of the room by changing your accent pieces.

Kitchens have become the heart of a home – a place

where everyone loves to gather. If you have the opportunity, open the space to the rest of your home to really give a feeling of spaciousness. A trend that continues to be popular is the use of brushed metal and stainless steel in everything from the fixtures, the sink and the refrigerator. Not only does it reflect a sophisticated elegance in your kitchen, it does double duty of being easy to clean and functional.
